Bangor, Maine Utility Information Sheet

Essential contacts for setting up services at your new home

Before calling: Have the property address, service start date, identification and—when available—the prior owner's supplier information. Confirm which services are included if you are renting.

Questions to ask before choosing a fuel supplier

- Who owns the propane tank? A supplier-owned or leased tank may limit your choice of company.
- What is the delivered price per gallon, minimum delivery and new-customer fee?
- Is automatic delivery available, and is its price different from will-call delivery?
- Are budget, pre-buy or price-protection plans offered?
- Does the company provide 24-hour no-heat service and annual equipment maintenance?

PROPANE SAFETY: If you smell propane, leave the building immediately. Do not operate switches or phones inside. From a safe location, call 911 and your propane supplier.
